*Extreme flexibility
for refined performances*

Egro ONE Top-Milk XP NMS is endowed with two milk outlets for the simultaneous delivery of beverages whose quality is beyond compare.

With the Multi-Milk Selection option, the operator may make a highly versatile use of two different types of milk. Also available in the TWO Top-Milk XP NMS configuration for an unrivalled performance.

up to
250
espressos / hour

up to
180
caffees / hour

up to
250
cappuccinos / hour

up to
150
latte macchiato / hour

Two main versions:

ONE Touch

with a large 5.7" touch display

ONE Keypad

with a traditional keypad.

The ONE Touch has an advanced user interface with a 5.7" touchscreen graphic display in full colour.

The easy-to use user interface guides the barista through the choice of products. The multi-colored page system enables the barista to choose from 48 products, each one with its own attractive user-friendly icon. Restricted access technical menus offer the machine administrator a wide range of additional functions, such as precisely defining the ingredients of each individual drink, creating new drinks, checking machine consumption, running diagnostic checks and regularly cleaning the machine with step-by-step procedures shown on the display.

POWDER MODULE. The Powder Module allows for the management of a great number of beverages in powder form. It is an external device positioned on the right hand side of the machine and consists of two hoppers that may either be used with one powder or may operate sepa-

rately with different aromatized, spiced, caramelized, chocolate-based and milk powders. An alternative high-performing solution that is well suited to all those venues wishing to offer their customers an increasingly varied and exhaustive choice of beverages.

NEW MILK SYSTEM. Egro ONE Top-Milk XP NMS offers customers the possibility to choose from a vast range of milk solutions, specially studied to satisfy the multitude of commercial formats operating in the Ho.Re.Ca sales channel. Now regulated by means of appropriate software, the temperature and consistency of milk-based beverages are variables that may easily be configured and modified by a technician. The new dispensing spout, consisting of a single component that is easy to remove and take apart into two pieces, ensures perfect hygiene. The patented MLR (Milk Line Rinsing) system makes it possible to effect and to set a rapid rinsing phase with the aid of cold water and air, which safeguards the environment and reduces electricity consumption. The quick and simple daily washing cycle has been automated to such an extent that the barista just has to add the detergent.

NEW FRIDGE. Egro ONE Top-Milk XP NMS has an innovative fridge equipped with a convenient external display, which is supplied as a standard feature. The new Fridge, whose storage capacity is equivalent to 6.5 litres, is supplied with a capacitive sensor to accurately monitor the milk level in the tank. With the Multi-Milk Selection add-on, the user may operate with two different kinds of milk to satisfy the most demanding palates. All configurations offered with the ONE Top-Milk XP NMS version allow for the refrigeration unit to be positioned under the counter, if so desired.

DURA-BREW. The international spirit of Egro ONE is underscored by the enhanced brewing group in stainless steel 18 grams, created for the specific purpose of enabling the preparation of coffee beverages in perfect American and North European style. The brewing unit boasts a revolutionary patented hermetic closing system, which requires less maintenance and reduces the overall running costs of the machine.
